Invitation

Linkin Science, welcomes you all to the **Global Nursing Meet & Expo** with the theme **Enlightening inspiring thoughts on research in Nursing practice, and management,towards a better Health care..** which will be hosted in Dubai during **April 02-04, 2018.**

Who Should Attend?

- Registered Nurses**
- Advanced Practice Nurses**
- Physician Assistants**
- All healthcare professionals**

Conference sessions will focus on the expanding roles of registered nurses in primary care and behavioral healthcare, how nurses must produce value in value-based payment systems, what's new in forecasting the future supply and demand for nurses, and much more. Nursing practice is both a science and an art. It requires scientific skill yet demands a strong background in the social sciences and humanities. Nursing makes a significant contribution to the health maintenance, health promotion and well-being of individuals, local communities and populations. A major challenge for current and future nursing practice, education and management is to address health for all and work towards equity and access to health care.

Regards,
Scientific Committee
